Time	Topics	Tentative Venue
Monday May 27	8:30-10:00 Cienki 1: Language as object versus language as process in the cognitive linguistic paradigm	
	10:10-11:40 Gries 1: Corpus linguistics, cognitive linguistics, and psycholinguistics:on their combination and fit	

## Speakers and Schedule for CIFCL-12, May 27-31, 2013, Beijing

<http://cifcl.buaa.edu.cn/>

**Alan Cienki:**

### **Ten Lectures on Researching Spoken Language as Dynamic and Multimodal: Implications for Cognitive Linguistics.**

Alan Cienki is Associate Professor in the English section of the Department of Language and Communication at the Vrije Universiteit (VU) in Amsterdam, Netherlands.

He is Chair of the international Association for Researching and Applying Metaphor (RaAM), Associate Editor of the journal *Cognitive Linguistics*, and founder of the Amsterdam Gesture Center. <http://www.let.vu.nl/staf/a.cienki>

One of his major research interests is how speech and gesture reflect processes of conceptualization. He is co-editor of the volumes *Conceptual and Discourse Factors in Linguistic Structure* (2001) and *Metaphor and Gesture* (2008). His education in the USA included receiving a BA from Hamilton College in Russian Studies, and an MA and PhD in Slavic linguistics from Brown University. He then taught at Emory University (USA) in the Dept. of Russian and East Asian Languages and Cultures. At Emory University he co-founded and later directed the Program in Linguistics, and also served as the Director of the PhD program in Culture, History, and Theory of the interdisciplinary Graduate Institute of the Liberal Arts.

**Stefan Th. Gries:**

### **Ten Lectures on Quantitative Approaches in Cognitive Linguistics: Corpus-linguistic, Experimental, and Statistical Applications.**

Stefan Th. Gries earned his M.A. and Ph.D. degrees at the University of Hamburg in 1998 and 2000 and is currently (Full) Professor of Linguistics in the Department of Linguistics at the University of California, Santa Barbara (UCSB) and Honorary Liebig-Professor of the Justus-Liebig-Universität Giessen.

Methodologically, Gries is a quantitative corpus linguist at the intersection of corpus linguistics, cognitive linguistics, and computational linguistics, who uses statistical methods to investigate linguistic phenomena (corpus-linguistically and experimentally) and test and develop corpus-linguistic and statistical methods. Theoretically, he is a cognitively-oriented usage-based linguist. Gries has authored three books, co-edited six volumes, and has (co-)authored articles in the leading peer-reviewed journals of his fields (*Cognitive Linguistics* and *International Journal of Corpus Linguistics*) and many other peer-reviewed journals. He is founding editor-in-chief of the international peer-reviewed journal *Corpus Linguistics and Linguistic Theory*, associate editor of *Cognitive Linguistics*, and performs editorial functions for many international peer-reviewed journals and book series.
